EXPERIENCE**AWS**

Senior Software Engineer, July 2020 — Present

Amazon Rust Team

- Lead the team supporting Rust adoption across Amazon. Find great ideas from teams around the company and distill them into core primitives that become de facto solutions.
- Created [metrique](#), a low-overhead, wide-event metrics library. It replaced effectively all hand-written metrics libraries at Amazon.
- Created [dial9](#), a flight recorder and profiler that records Tokio runtime events, application traces, and kernel events on a single timeline. Runs in production at Amazon, Cloudflare, OpenAI, and many others.

AWS SDK for Rust

- Founded the [AWS SDK for Rust](#) team and led it to GA. At 20–30 μ s of overhead per request, it is among the fastest AWS SDKs.
- Built [smithy-rs](#), the code generator behind the Rust SDK, dozens of internal AWS services, and several external customers.

Self Employed, Redwood City, CA

Freelance Software Engineer, February 2016 — 2020

- CTO/senior engineer for hire: consulted on architecture and scalability, and joined startups for 1-3 months to finish high-value projects.
- Wrote [angle-grinder](#), a popular Rust CLI app for log analytics, and [Crossword.Tools](#), a crossword construction tool with a Rust fill algorithm compiled to WASM.

Sumo Logic, Redwood City, CA

Software Engineer Lead, February 2014 — February 2016

- Led the search performance team; developed the optimizer for the Sumo Logic query language.
- Authored [open source Elasticsearch library](#)

Filepicker.io, San Francisco, CA

Principal Engineer, January 2013 — January 2014

- Scaled a highly available service to >300QPS while reducing the number of servers required

SKILLS

Rust, Java, Scala, Python, Go, (my/Postgre)SQL

EDUCATION

Massachusetts Institute of Technology, Cambridge, MA

June 2013

B.S., [Computer Science and Engineering \(6–3\)](#), *GPA*: 4.9/5.0

INTERESTS

rock climbing, mountain biking, trail running
